Getting started in cybersecurity? Looking for a career change? NetSPI University (NetSPI U) is a full-time, paid training program that focuses on penetration testing. Start your cybersecurity career with NetSPI, the leader in enterprise pentesting and attack surface management.

During the six-month training program, you will gain a baseline skill set to execute web application and external network pentests – setting a foundation for growth in the penetration testing industry.

NetSPI U features classroom-based learning, hands-on labs, and opportunities to shadow/mirror some of the most brilliant minds in cybersecurity. You will also have the ability to contribute to new and innovative tools, techniques, and methodologies.

NetSPI U Benefits:

- Flexible time off
- Competitive pay
- Medical, dental, vision, and disability insurance
- HSA match
- 401k match
- Office perks (paid parking, networking opportunities, etc.)
- Industry-high employee retention rate of 92%

FAQ:

Who leads NetSPI U?
Learn from some of the best in penetration testing including:
- Aaron Yaeger
- Melissa Miller
- Jake Karnes
- Ryan Krause

Is NetSPI U a paid opportunity?
Yes, NetSPI U offers competitive pay and benefits.

What is the format of the class?
NetSPI U is an extension of the classroom. The training program combines classroom-based training with hands-on lab work and shadowing/mirroring opportunities with NetSPI’s senior consultants.

I went through NetSPI U. Now what?
After six months in NetSPI U, you will be reviewed in a lab environment and considered for a promotion to a client-facing security consultant at NetSPI.

NetSPI U was an incredible experience that both gave me the best possible foundation for pentesting and introduced me to an amazing work culture.

NetSPI U gave me the knowledge and tools to succeed in my career.
