## THE INDUSTRY LEADER IN PENETRATION TESTING

We conduct more than 100,000 hours of testing every year and we're changing pentesting entirely. We make it easier to track trends and improve your vulnerability management program. Our security experts author one of the industry's top security blogs. And we're trusted by seven of the top 10 U.S. banks. Why? Because our people, our processes, and our technology are unrivaled.

## CONSISTENT PROCESSES

Process is ingrained in our culture. From project management workflows and practitioner guides to standardized checklists and testing playbooks, we have formalized quality assurance and oversight so we can deliver consistent results.

## SYSTEM OF RECORD

Our purpose-built vulnerability management platform, NetSPI Resolve™, is the single source of truth for all vulnerability data regardless of its source. The platform aggregates, normalizes, and correlates automated security scanner outputs and manually identified vulnerabilities, streamlining the security testing lifecycle. This allows us to scale to test hundreds or even thousands of applications with multiple ongoing projects simultaneously.

## EXPERIENCE AND EXPERTISE

Since 2001, we have focused on good hiring, ongoing training, constant research, and long retention rates. Our security experts have authored more than 100 scripts and tool sets as well 300+ blogs. So when you hire NetSPI, you don't just get a person, you get a collaborative team that benefits from that tribal knowledge to produce the highest quality work.

## ACTIONABLE GUIDANCE

We don't just tell you there is vulnerability that can be exploited, we prove it and show you how it can be exploited. And we provide guidance on how to remediate it, so you can close security gaps.

## OUR SERVICES

### APPLICATION PENTESTING

- Web Application
- Mobile Application
- Thick Application
- AppSec as a Service

### CLOUD PENTESTING

- Amazon Web Services (AWS)
- Google Cloud (GCP)
- Microsoft Azure

### NETWORK PENTESTING

- Internal & External Network
- Wireless Network
- Host-Based, Mainframe, & Virtual Desktop

### TRAINING

- Dark Side Ops 1 – Malware Dev
- Dark Side Ops 2 – Adversary Simulation
- Dark Side Ops 3 – Azure Cloud Pentesting
- Secure Code Warrior Partner

### STRATEGIC ADVISORY

- Security Assessment
- AppSec Design Review
- Threat Modeling

### ADVERSARY SIMULATION

- Red Team
- Assumed Breach
- Collaborative
- Ransomware Assessments
- Detective Control Review

### SECURE CODE REVIEW

- SAST & SCR
- SAST Triaging
- Remediation Validation

### SOCIAL ENGINEERING

- Email (Phishing)
- Phone (Vishing)
- On-Site Assessment
- Physical Pentest
- Physical Controls Audit

## PENETRATION TESTING AS A SERVICE

Clients praise NetSPI Penetration Testing as a Service (PTaaS) for the simplicity of scoping new engagements, viewing their testing results in real-time, orchestrating remediation, and the ability to perform always-on continuous testing. NetSPI finds vulnerabilities that others miss and delivers clear, actionable guidance, allowing customers to find, track, and fix their vulnerabilities faster.

### THE BENEFITS

Live Reporting

Accelerated Remediation

Enhanced Communication

Continuous Testing
